DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on April 24, 2006, is acknowledged. The traversal is on the ground(s) that any search for the invention embodied in Group I would necessarily include a search of the invention in Group II. This is not found persuasive because Group I and Group II are classified in different classes and a search Group I would not include searching the classification area of Group II and vice versa.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

2. Claims 16-23 and 28 are objected to because of the following informalities: the use of the words "characterized in that" is objected to. In order to conform to standard U.S. practice, it is suggested that Applicant amend the claims to read on "wherein." Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 16-23 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 discloses a "single capillary [that] has a diameter less than 100 μm , preferably less than 30 μm , wherein a section through the metal fiber thread is provided with more than 100, preferably more than 500 individual capillaries." This claim is considered vague and indefinite because the Examiner is unclear as to what the "capillaries" are. Neither the specification nor the drawings provide guidance regarding "capillaries." Clarification/correction is required.
